

# Measuring for Your Drapes

## **Find the length:**

Measure from curtain rod or eyelet ring height to the floor (A):

\_\_\_\_\_

Add or subtract for desired effect:

*(E.g. subtract a few inches for above the floor drapes, or add a few for a "puddle" or "trouser break" effect.)*

+ / -  
-----  
(A)

Total Length:

=====

## **Find the width(s):**

**\*1 "Width" is approx. 22" wide.\***

Measure full window frame width (B):  
*(Measure from the outer most points of the window frame.)*

\_\_\_\_\_

Add 16 inches for overlap:

+ 16"  
-----  
(B)

Total Width for Coverage:

=====

Divide Total Width by 2:

÷ 2  
-----  
Total Width

Total Width Per Panel (C):

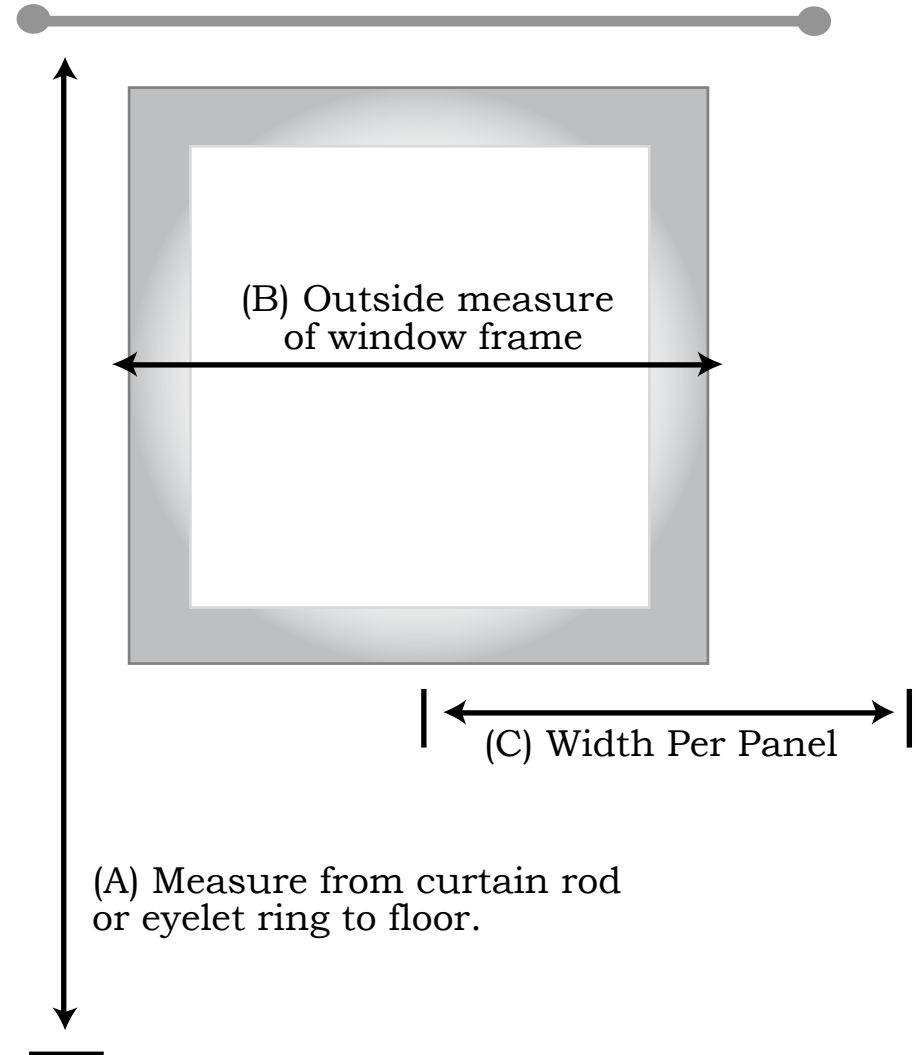

=====

Divide Panel Width by 22":

÷ 22  
-----  
(C)

=====

= Total "Widths"

(A) Measure from curtain rod or eyelet ring to floor.
